- 3 MIQvet, an introduction

MIQvet, the calibration

MIQVET

*M*odel for *I*mage *Q*uality

Calculate your radiology.

MIQvet

- 4 MIQvet, an introduction

MIQvet, the calibration

For any kV there can be found a mAs value resulting in the minimal dose needed for an image of good quality.

Calculate your radiology.

MIQvet

- 5 MIQvet, an introduction

MIQvet, the calibration

When the chosen kV is low, the mAs needed will be high and tube wearing increases dramatically.

Calculate your radiology.

MIQvet

- 6 MIQvet, an introduction

MIQvet, the calibration

*When the chosen kV is high, contrast in the image will be reduced.
An advantage is that there will be less scattered radiation.*

Calculate your radiology.

MIQvet

7 MIQvet, an introduction

MIQvet, the calibration

Settings in radiology:

- * depend on your hardware
- * determine image quality
- * depend on the subject

Calculate your radiology.

MIQvet

8 MIQvet, an introduction

MIQvet, the calibration

Settings in radiology:

- * *kV determines the penetration of the radiation used for imaging.*
- * *mAs determines the amount of radiation at a given kV.*

Calculate your radiology.

MIQvet

9 MIQvet, an introduction

MIQvet, the calibration

Settings in radiology:

- * *an increasing kV will result in more penetration of the subject.*
- * *it will reduce the contrast in the image.*

Calculate your radiology.

MIQvet

10 MIQvet, an introduction

MIQvet, the calibration

Settings in radiology:

- * *an increasing mAs will result in more tube wearing.*
- * *this will lower the kV needed for the minimum dose of radiation and thus result in better contrast.*

Calculate your radiology.

MIQvet

- 11 MIQvet, an introduction

MIQvet, the calibration

*A calculated example
with MIQvet.*

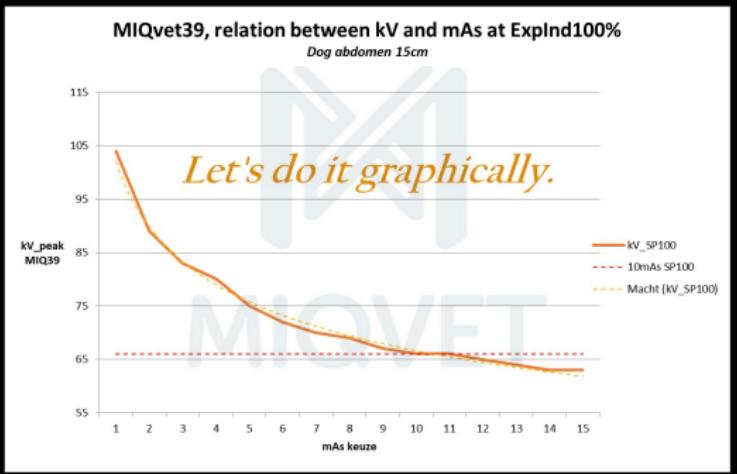

MIQVET

MIQvet

18 MIQvet, an introduction

MIQvet, the calibration

MIQVET

Due to the properties of digital X-ray detection systems, in MIQvet the default setting for mAs is set to 10. Users can select other values when preferred.

29 MIQvet b.v.

The calibration.

MIQvet

MIQvet,
an
introduction

19 MIQvet, the calibration

MIQvet: the calibration

MIQVET

29 MIQvet b.v.

The calibration.

*MIQvet is based on a
set combination of
X-ray tube and detector*

The calibration.

*This combination has
an unkown sensitivity.
To determine the
sensitivity calibration is
needed.*

The calibration.

MIQvet

MIQvet,
an introduction

22 MIQvet, the calibration

*Calibration is done by
making images of an
abdomen of approximatlly
15cm.*

29

MIQvet b.v.

The calibration.

*Measure the subject
exactly and calculate kV
and mAs in standard
calibration.*

The calibration.

MIQvet

MIQvet,
an
introduction

24 MIQvet, the calibration

*At standard calibration
MIQvet calculates
66kV and 10mAs
for an abdomen of
exactly 15cm.*

29 MIQvet b.v.

The calibration.

MIQvet

MIQvet,
an
introduction

25 MIQvet, the calibration

*Make images in a range
of -10kV to +10kV
in steps of 2kV.*

29

MIQvet b.v.

The calibration.

MIQvet

MIQvet,
an introduction

26 MIQvet, the calibration

*Select the best image
in this range and enter
the settings of this
image as your calibration.*

29

MIQvet b.v.

The calibration.

MIQvet

MIQvet,
an
introduction

27 MIQvet, the calibration

*MIQvet will calculate
and store the
sensitivity of your
system.*

29 MIQvet b.v.

The calibration.

MIQvet

MIQvet,
an
introduction

28 MIQvet, the calibration

*A tutorial with
demo images
is available.*

29 MIQvet b.v.

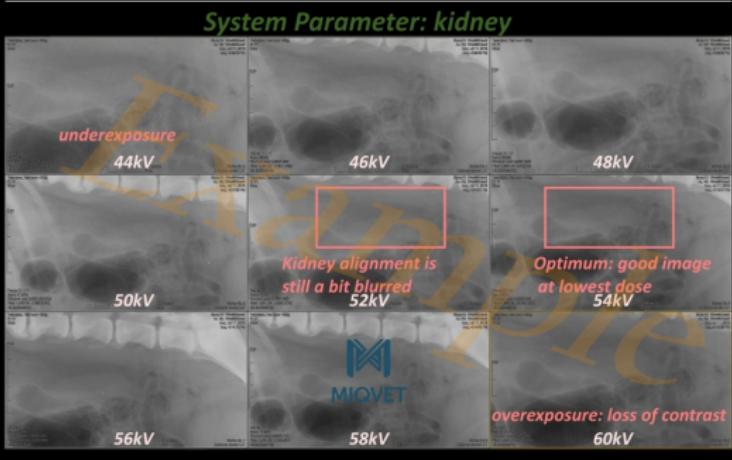

Example of calibration.
